ABOUT ME

Hi! I'm Daniel and I've been working as software engineer since 2008. I'm a full stack developer, specialized on frontend side: Web applications and mobile native apps (iOS and Android) and SAP Commerce Platform (previously Hybris) developments. I have a great sense of responsibility and involvement, always committed with work and team. With ability to plan, coordinate, review, test, document and maintain projects.
I'm a very curious person and always want to know how everything works (from the client to the backend), in order to see if anything can be improved, refactored or cleaned (I can't stand develop with messy code). I like to make researches on new technologies and be updated with the known ones.

MY EXPERTISES

(some of them)

Programming languages & Specifications
Java EE, Java Servlets, JSP, JSF2, JDBC, JPA, SQL, PHP, Python, C/C++, Objective-C, Swift, Javascript, XML, XHTML, HTML, CSS.

Frameworks & Libraries
Spring framework, Spring MVC, Hibernate, Struts, CakePHP, iOS SDK, Android SDK, Apache Cordova, JQuery, AngularJS, Backbone, Marionette, NodeJs, Socket-IO, Dojo, Selenium, Compass, Bootstrap.

IDEs, Tools & Apps
Eclipse, netbeans, STS, Xcode, IntelliJ, Android Studio, Atom. Subversion, Git-Lab, Maven, Ant, Coda, Cocoa Rest Client, SQLDeveloper, SQL Workbench, Jira, Jenkins, Sonar, SoapUI.

Design Tools
Adobe Photoshop, Adobe Premiere, Adobe After effects, Autocad, 3DMax, Rhinoceros, Swift3D

PROFESSIONAL EXPERIENCE

[2017, -] SAP Commerce Cloud Tech Lead @ Seidor (seidor.com)

What did I do?

- Leading development team in order to create an international B2B platform for Derco's company. The new "Dealer Portal" powered by Hybris/SAP provides all necessary tools for vehicle and spare parts sales management, document handling such as guarantees and maintenance reports, customers, services...
- Team leader, management and support for an eCommerce created with Hybris Core to handle products, and customized to include a Drupal Frontend as CMS and site representation for the Puig Company. The project wanted to centralize all the products of all their brands, such as: Carolina Herrera, Paco Rabanne, Penhaligon's and Queendom in a single platform.
- Team Leader/Tech Lead for the b2b/b2c platform remodelation for the Bihr Company, the leading European distributor of rider gear and spare parts, accessories and tyres for motorcycles, quads/ATV and scooters. Project hosted on SAP Commerce Cloud Platform.
- Business Analyst role to fulfill needs on the projects, such as client trainings, QA testing support, documentation, refinement meetings support...
- Backend developments for Tous and Eurofred projects.
- Customized monitorization utils to fulfill Puig Company's analytics.

What did I learn?

- Project organization and management. Team leadership, tech advice, task reviews and planification.
- Recruitment and training of new team members. Remote workers organization (different timezones to handle on a same project)
- Backend and frontend technology improvements. Highlights: Spring and SAP Commerce structure updates.
- SAP Commerce Cloud Platform deployment workflow understanding

Example projects

Bihr - b2b platform
Carolina Herrera - b2c platform
Paco Rabanne - b2c platform
Penhaligon's - b2c platform
Queendom - b2c platform
Derco - b2b platform
Puig - b2b/monitoring platform
Tous - b2c platform
Eurofred - b2b/b2c platform

[2015, 2017] Software Architect / Engineer @ S2 Grupo (s2grupo.es)

What did I do?

- Developing mobile applications based on VoIP capabilities and other basic projects for iOS and Android devices. With experience in instrumentation processes with analytic tools and reports, push notifications management, Cloud services handling and final distribution in Stores, Enterprise an Ad-Hoc.
- Implementation and support on real time collaborative platforms for process management and risk analysis procedures purposes.
- Backup on security projects based on digital signature processes.

What did I learn?

- Backend and frontend technology improvements. Highlights: Spring updates, CakePHP, Python, Backbone, Marionette, NodeJs, websockets, Swift, Linphone
- Real time monitoring and internet security basics.

Example projects

LYNXed by FERMAX
tiké - Sistemas de Gestión
Ast*risk

[2014, 2015] Frontend developer @ Oramon S.L. (www.oramon.nl)

What did I do?

- Improvements, new features and mainteinance of site web based on Hybris technology: *thesting.com*
- theSting.com expansion process by applying internationalization rules to the website.
- Creating automated testing tools for website mainteinance with Selenium.
- Developing Point Of Service Android application for *theSting* physical stores.

What did I learn?

- Some frontend improvements and tools like compass, responsive rules, and Selenium.
- Project planification by Scrum methodology and Agile tools.
- English writing and speaking improvements (Daily scrum-style stand-ups with the Netherlands' team).

Example projects

the Sting

[2008, 2014] Software Engineer @ Okode S.L. (www.okode.com)

What did I do?

- Developing mobile applications & frameworks for iOS and Android devices. With experience in instrumentation processes with analytic tools and reports (Crashlytics, TestFlight, NewsRelic...), push notifications management, Cloud services handling and final distribution in Stores, Enterprise an Ad-Hoc.
- Backend development creating REST services based on Spring to communicate with mobile apps and populate web applications.
- Websites and administration platforms implementations to manage and configure mobile apps and external services.
- Tools and websites based on GIS technologies.
- Websites design and development based on CMS.

What did I learn?

- All backend and frontend bases, from the old to the new technologies. Last years highlights: Spring and AngularJS.
- Mobile/Tablet applications development iOS and Android.
- Project organization and management. Team leadership and planification.

Example projects

mobitransit Helsinki
Lladró Catalog App
Mapfre Social and GIS Solutions
Andreu World App
Ikea SmartList App
KCSolutions Apps & Platform
